Summary of the verification scheme

Name of the acceptance	News in Facility Faces and Law Forest Manifesian Costs in Page New Origins
Name of the system	Name in English: Forest and Log Export Monitoring System in Papua New Guinea
Related Area General overview of	Region /Country: Papua New Guinea Party responsible for issuing verification
verification	Name: SGS PNG Limited
verinication	Location: PNG Forest Authority Headquarters Building, Papua New Guinea
	Communication: bruce.telfer@sgs.com (+675) 323 1433
	Outline of issuing process
	Companies affix official SGS bar-coded tags to all logs at time of harvest (each has a unique
	number).
	SGS notified of impending shipment 2 weeks in advance.
	SGS inspectors complete scaling check (10%) and species check (100%) prior to loading.
	Ship loading is monitored to produce an independent tally of loaded logs.
	SGS Inspection Report is issued at the completion of loading and is used by all Govt.
	authorities to clear the shipment for export.
	Copies of all shipping and inspection documents are held by SGS.
	All information is entered into a central database and monthly reports are provided to a wide
	range of Govt. authorities and other stakeholders.
	The system shall verify legality only /or both sustainability
	SGS PNG system verifies aspects of the legal origin of logs.
Scheme to check for	Definition of legality
legality at the time of	No formal definition exists but SGS will not perform an inspection unless:
logging	Official log tags have been affixed to he logs. These tags are not issued unless the Forest
	Service has confirmed that the company is holding a legitimate operating permit of some
	kind for the forest area.
	Shipment must have an Export Permit issued by the PNG Forest Service and an Export
	Licence issued by the Department of Trade and Industry.
	Logs are correctly measured and identified.
	Both the export volume of a shipment and the prices for the logs have formal approval from
	the PNG Forest Service.
	Export taxes are paid in the correct amount.
	Relevant laws:
	PNG Forest Act and Customs regulations.
	Details of presumed illegal activities
	Some examples: Species mis-declaration; Under measurement of logs; Shipping
	undeclared logs; Shipping with Export Permit and Licence; Not paying export tax
	Procedures for retaining and verifying the evidence
	Logs are physically inspected at the export port by SGS inspectors who employ bar-code
	Logs are physically inspected at the export port by SGS inspectors who employ bar-code scanners and portable computers.
	Logs are physically inspected at the export port by SGS inspectors who employ bar-code scanners and portable computers. Ship loading is not authorized by the PNG Forest Service unless the SGS pre-shipment
	Logs are physically inspected at the export port by SGS inspectors who employ bar-code scanners and portable computers. Ship loading is not authorized by the PNG Forest Service unless the SGS pre-shipment inspection gives a satisfactory result.
